

# Trusted Data Management for AUTOSAR Adaptive platform

Demo available in Hall 1 Booth 1-234 Come and meet us !

ETAS

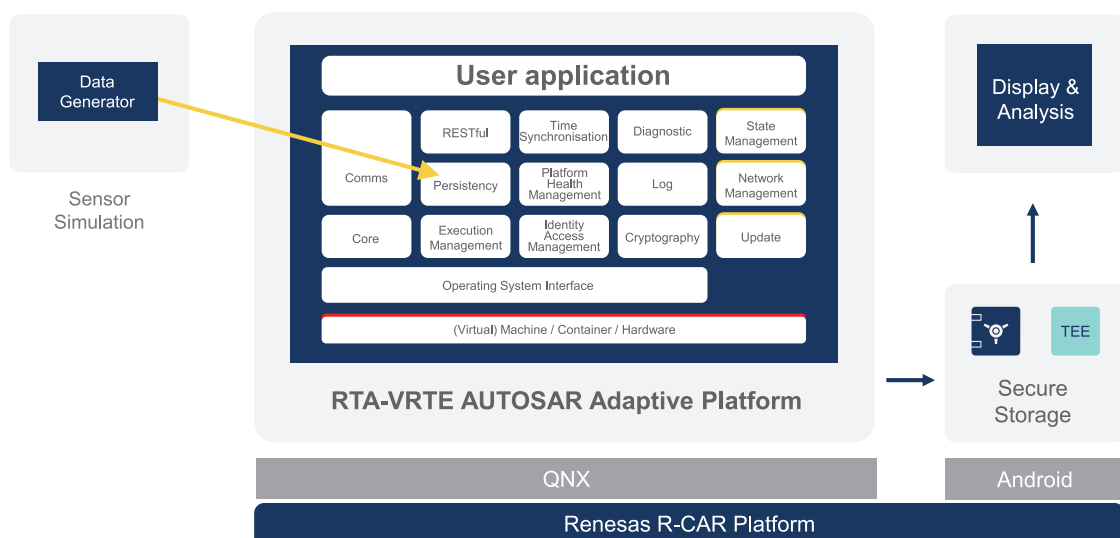

Mimer 

TRUSTONIC

BlackBerry QNX

## Key demo features:

- ▶ A vehicle can interact with any data driven application in the Enterprise cloud or an Embedded system
- ▶ Possible to add functions outside the RTA-VRTE AUTOSAR Adaptive Platform that can directly leverage the R-CAR architecture
- ▶ Provides the ability to handle concurrency between applications with transactions
- ▶ Database functionality with hardware backed security
- ▶ Access control protected data so only authorised clients can read and/or write to the database
- ▶ Ability to add or change capabilities and high-level functions via SQL access, regardless of the origin
